Audio MusiKraft First Series Step-up Transformer

Model: SUT-First

The Audio MusiKraft First Series Step-up Transformer is exclusively designed for low output moving coil cartridges like the Denon 103 or 103R types or similar ones having between 10 and 50 Ohms of impedance, and needing around 20dB of gain. For our step-up, we chose a minimalist and compact approach to carefully maintain the signal as pure as possible. Its most significant sonic benefits are; utmost transparency and an exceedingly large bandwidth at both ends.

Thanks to its compact case size, its extremely short internal wiring and unobtrusive configuration, it is capable of outstanding immunization to any ambient induced interference (EMI and RFI) therefore freeing the music from background noise.

The rear ground switch typically allows three judicious selections in the event to minimize the presence of noise while used in stereo or mono, and at all moments the mono's left and right signal grounds remain independent when in mono. The aluminum enclosure rest on a Tung oil sealed birch wood dock which identifies all markings.

Once again, this new SUT will typically deliver what you've come to expect from the superior MusiKraft sound quality and outstanding craftsmanship. We aim no less than the best and most of all that you reach your musical nirvana with this refined product.

### Specifications:

- Material: aluminum (case), birch wood (dock)
- Finish: speckled paint (case), Tung oil (dock)
- Color: matte black (case), clear (dock)
- Three (3) position ground switch (case+L+R, case only, case+L)
- Optimal phono cartridge impedance: 10 to 50 Ohms
- Input impedance: 150 Ohms
- Gain: 20dB
- Frequency response (20Hz / 20kHz) : -0.05dB / -0.06 dB
- Frequency response (82kHz) : -0.1dB
- SUT case size (LxWxH): 94 x 40 x 58mm
- Overall footprint size including wood dock (LxWxH): 106 x 69 x 62mm
- Package size (LxWxH): 158 x 106 x 78mm
- Unit weight: 284g = 255g (SUT), 29g (10mm wood dock)
- Package weight: 345g

### Connectivity:

**Package includes:** One (1) assembled step-up transformer unit, one (1) birch dock with markings.

**Options:** Audio MusiKraft First Series SUT is available with a 7mm, a 10mm dock or without any.

### Take in consideration:

- While doing our sonic evaluations, the felt pads were chosen as our preferred resting pads for the SUT enclosure. Removing or replacing them will affect the sound.
- Use short signal cable to minimize induced noise.

**Caution:** Keep this unit away from any power transformers and any source which produces a magnetic field.

**Product warranty:** One (1) year. Refer to the [Terms & Conditions](#) page for the details.
